19th February 2019

Noise restrictions commencing Summer 19

In February 2018 I wrote to you advising of operational restrictions that we had to put in place following a breach of our permitted night noise contour limit. I advised at the time that the restrictions would be in place for Summer 2018 and every subsequent Summer season.

I am writing to you today to remind you of the restrictions in place for this Summer 2019 which were communicated at the S19 coordination committee on the 19th September 2018.

The following measures will be in place for this Summer and every subsequent Summer until further notice;

- No ad hoc movements will be permitted including Commercial, GA and Maintenance between 2200-0559 GMT 1st June – 30th September
- No further night slots to be allocated to series flights 2200-0559 GMT 1st June – 30th September
- No re-scheduling of existing allocated slots from the day time 0600-2159 GMT into the night time 2200-0559 GMT 1st June – 30th September
- For Summer 2019 and all subsequent seasons no aircraft with a value greater than QC1 will be permitted to operate in the night-time period.
- No new slot applications with an aircraft QC value greater than 0.5 will be permitted between 2200 – 0559 GMT

If you have any queries relating to the restrictions then please do not hesitate to get in touch with one of the Flight Operations Team at flightops@ltn.aero.

It is with great regret that we have to continue to apply these restrictions and understand the impact that this will have, however we must work within the legal limits that are attached to our planning approval.

Yours sincerely

Neil Thompson
Operations Director
