ADDITIONAL REQUIREMENTS	
New T2 Extension Capacity	Manchester Airport proposes to amend adhoc/in-season terminal capacity in early 2022 to reflect the proving of T2 Extension. This will see an increase in T2 capacity linked to airline moves, with total capacity controlled by a shadow limit equivalent to the combined historic demand of future T2 airlines plus a small allowance for flexibility. This overarching cap will mean that as T2 capacity increases, T1 capacity will reduce. This reflects the long term "ManTP" Airport Transformation Programme which will increase the capacity of T2, but ultimately close T1.
Temporary Load Factors	Manchester Airport reserves the right to adjust airline load factors in-season as a proxy to reflect ongoing COVID process challenges on particular routes, or to reflect operational efficiencies being realised by certain carriers/handlers linked to the Transformation programme.
Night Restrictions	No QC8/16 movements 2300-0659L, No QC4 departures scheduled 2330-0559L.
Large a/c	AN225/AN124/B747-800/A350-1000/B777X/A340-600 PPR apron control ++++ A380 PPR if non regular service
PPR	Departures in Terminal 3 2100-0525L - contact T3 managers for approval. (series flights at initial submission OK).
PPR	Domestic operations in Terminal 1 & 2 - contact terminal managers for approval.
Parking	PPR with Capacity team / Apron Control of non regular carriers requiring overnight parking.
Transit flights	PPR with Capacity team of new transit flights and retimes to existing flights.
New Based Aircraft	Due to major airfield construction taking place any new additional based aircraft will need prior approval from the Airport's Capacity team / Apron
T2 Terminal Shadow Limits	With effect from the S19 co-ordination process, shadow limits will be applied to the T2 terminal co-ordination process to protect grandfather rights
