Additional Runway Constraints

1. The 15 minute constraints are offset against the clock hour starting at 5 minute to the hour.
2. 15 minute limits set so as to provide flex within hourly totals of 2-3 ATMs. This helps to smooth the demand within the hour so as to maximise throughput and reduce runway holding. The maximum number which can be scheduled in 15 minutes is 14. In hours where 55 ATMs are scheduled this allows a flex of only 1 on totals.
3. 5 minute limits are fixed at 4 arrivals and 5 departures which represents the maximum throughput of each theoretically achievable.
4. Due to the limited code F parking capacity at Gatwick, all A380 slot requests will in the first instance be referred to GAL via ACL for approval. Due to the increased runway separation times, an A380 arrival requires 2 x 15 minute arrival slots and an A380 departure requires 2 x 15 minute departure slots but in either case only one slot is used on totals.

Limits will be reviewed during initial coordination to identify where capacity flexes can assist with coordination.

Appendix 3

Stand & Gate Capacity Limits

ACL will apply their stand occupancy calculator to assess spare capacity against stand provision. This will be applied to overall provision (pier served and remote) by stand size and to pier served provision by Terminal and stand size. The model will be calibrated against operational stand plans and limits set on spare capacity such that when the limit is breached, the slot will be referred to GAL airfield operations for approval.

Potential breaches in gate capacity will be managed in Score using a 90 minute rolling departure count which has been calibrated to 29 dep/90mins in South Terminal and 37 dep/90mins in North Terminal applied between 03:00 and 06:55 UTC. As this is a new parameter for S23, when this limit is breached, the slot will be referred to GAL airfield operations for approval. This will be kept under review during S23.

Parking Position Availability

South Terminal

Code C : 38 Code C equivalent

Code E :16 Code E parking positions

Pier served gates: 31

Departures coaching gates: 4

North Terminal

Code C : 39 Code C equivalent parking position (-3 for Pier 6 works)

Code E : 15 Code E parking positions (-2 Code E for Pier 6 Works)

Code F : 1 Code F parking position

Pier served gates: 36

Departures Coaching Gates: 10

Remote Parking

Code C : 60 Code C equivalent parking positions (-1 for work site)

Code F : 2 Code F parking positions

Note that the code C equivalent includes full use of MCA (Multi Centreline Apron) capability. The number of MCA positions available at any one time will depend on how many are blocked by widebody aircraft on stand.

NT Dom / CTA Deps	Pier Served Stands	6 stands	6 departures per 45 mins every 5 mins
ST Dom / CTA Deps	Pier Served Stands	5 stands	5 departures per 45 mins every 5 mins

Notes: Capacity Limits relate to runway demand with load factors applied to seat numbers.

CTA, common travel area, defined as Channel Islands, Isle of Man and Republic of Ireland. Domestic includes Northern Ireland.

*A referral capacity is set at 2,700 in ST and 3,200 in NT as capacity at immigration is sensitive to flight origin & NEU passenger mix. In the 2100 & 2200 hour the NT arrivals mix of traffic is such that additional demand may be accommodated up to 4,500/hr as an average.
