Background

Airport Coordination Limited (ACL) was formed in 1992 and is now the largest and leading independent airport coordination and capacity management organisation in the world. Based at Heathrow, the Company manages over three million aircraft movements annually, carrying in excess of 600 million passengers each year through the 72 Airports it serves. Airports include Heathrow – the world's second busiest international airport and subject to much political debate and continued demand for access from all over the world; Gatwick, the world's busiest single-runway airport; London City, the world's busiest city-centre airport and Dubai, the world's busiest international airport.

Overseen by IATA and regulated by the EU Commission in Europe, Coordination is the independent, neutral and transparent allocation of take-off and landing runway slots in way that optimises available airport capacity while satisfying airline commercial requirements. Coordination is a key link in the aviation planning chain and was put under a particular spotlight by the recent Airports (Davies Commission final report. In the final report Sir Howard Davies said that ahead of any new runway being built it was essential the UK best use of its existing capacity – something in which ACL plays a key part.

In addition to its core coordination function, ACL continues to develop new revenue streams through the development and implementation of additional coordination models to existing customers, the provision of schedule data sales, training and a wide range of consultancy services including forecasting. The Coordination team including Coordinators play a role in delivering the services purchased.
