

## ACL Message Rejection for King Khalid International Airport (RUH)

The SCR you have submitted has been automatically rejected. Kindly see the explanations below for why this may be:

### ACL Schedule Change Window

Depending on when ACL processes an SCR, we may be unable to make schedule changes. The table below outlines the change windows ACL is able to make changes to the RUH schedule

SCR processed by ACL	Schedule change window (changes available from)
Monday	Wednesday from 00:00 UTC
Tuesday	Thursday from 00:00 UTC
Wednesday	Friday from 00:00 UTC
Thursday	Monday from 00:00 UTC
Friday	Monday from 00:00 UTC
Saturday	Monday from 00:00 UTC
Sunday	Tuesday from 00:00 UTC

*GACA requirements stipulate no changes through ACL within 24 hours of operation during KSA weekdays (Sun-Thurs) and no changes 48 hours of operation if during KSA weekend (Fri/Sat)*

If ACL is unable to make the change, the request should be sent to the RUH ADM on [adm@riyadhairports.com](mailto:adm@riyadhairports.com)

Please note series commercial pax and freight slots are valid for 24 hours and slots should not be amended for “on the day” operational delays in order to facilitate both historic utilisation and slot performance monitoring.

### Unlinked Requests

All requests must be submitted in linked “turnaround” format except for **based** commercial pax and freight carriers.

### Planned Periods

Periods of planned coordination mean we need to disable message processing, such as:

- Initial Coordination for future season
- Historic Baseline Creation for future season
- System configuration

Kindly contact us on [current\\_season@acl-uk.org](mailto:current_season@acl-uk.org) if you need any further information or assistance.
