4 Aircraft Type Specific Constraints

4.1 Allowed Aircraft Types

All operators must comply with the EGLC AD 2.20 LOCAL AERODROME REGULATIONS stated in the UK-AIP.

4.2 Large Code C Aircraft (C-Series/A220 Series/Embraer E2 Series or larger)

A maximum of 4 Large Code C aircraft can be scheduled on the ground simultaneously. Scheduling of four or more Large Code C arrivals or four or more Large Code C departures within any 75-minute period is subject to an operational assessment by the airport.

4.3 British Aerospace Avro RJ Series Aircraft

All operations planned to be operated by Avro RJ series aircraft are subject to an operational assessment by London City Airport due to noise restrictions.

5 Check-In Capacity

London City Airport is currently replacing its check-in format and capacity moving towards a complete Self Service Bag Drop (SSBD) operation. The airport thereby aims to preserve capacity within the existing infrastructure and preserve the passenger experience through transition. In the interim, any new slot request for flights of type J,C, and G in peak hours (08:00 – 08:59 local and 18:00 – 18:59 local) is subject to a check-in assessment by London City Airport.

6 Parking Capacity

6.1 Ground Time

Scheduled turnaround times are allocated based on the aircraft's seating capacity. Any turnaround time request exceeding the permitted maximum will be reviewed by ACL and allocated on a non-historic basis only. Flight crew or engineers must be available to move an aircraft upon request by London City Airport.

Seats	Standard Allowance	Peak Hour* Allowance
0-104	30 min.	30 min.
105-129	35 min.	35 min.
130+	40 min.	35 min.

**If STA or STD: 08:00 – 08:59 (LT) and 18:00 – 18:59 (LT).*

London City Airport (LCY) continuously monitors declared seating capacities and will query any discrepancies.

6.2 Overnight Aircraft

Operators must obtain prior approval from ACL and LCY Airport for any changes in arrival-departure links within 7 days of the planned operation that result in an increased number of overnight aircraft at LCY.

6.3 Parking Stand Buffers

The standard buffer time between a departure and arrival on a stand is 15 minutes.

- The buffer times for those turnarounds longer than 30 minutes also must be agreed with ACL and LCY Airport and will be allocated on a non-historic basis only.
- Western Apron – 10 minutes between an arrival and a departure and 5 minutes between each arrival. This is in addition to the standard 15-minute buffer.

6.4 Parking Stand Capacity (Main Terminal)

A/C Group	Stand Capability	Number of Stands Available
Group-1	Approved A/C, wingspan <36m	9
Group-2	E190 aircraft or smaller	8
Group-3	DH8 aircraft or smaller	1
Group-4	AT4 aircraft or smaller	1
	TOTAL	19

6.5 Contingency Parking Stands

1x Group-2 stand is unavailable for scheduling during the day, increasing to 2x between 10:30 – 16:30 Local, all days.

7 RSL Working Group

To mitigate any impact of reduced capacity on future demand, the airport will reconvene a Runway Scheduling Limit working group comprised of Airport, Airline, ACL and NATS. The Airport COO or delegated authority shall chair the working group. The group will undertake a review process post Slot Allocation List (SAL) provision in and if required before final slot hand back. The group will consider any requests that were considered but not accepted due to reduced capacity. The group will recommend to the airport any changes to capacity following which a revised capacity shall be issued as deemed necessary.
